# MANAGED PRINT SERVICES

## MANAGED PRINT SERVICES

If you're like most businesses, reducing expenses and increasing productivity are keys to your success. As we are tasked with "doing more with less", our **Managed Print Services** (MPS) program can help you achieve this goal.

### What is MPS?

Eastern Business Systems, Inc. is committed to helping our clients streamline their print environment by identifying current printing costs and putting the controls in place to help improve workflow processes. Our MPS program can help address relevant questions like:

- How much do we spend on printing?
- Are we using our output print devices efficiently?
- Can I streamline the management of laser printer supplies?
- How can I best control runaway print volumes?
- Is there a way for our IT dept to solely focus on mission critical task and not manage printers?

## Printer Administrator Utility

Eastern Business Systems *Print Administrator Utility* is a network tool to facilitate the centralized management of Copiers / MFP's as well as other network printers. From a network computer, administrators can view detailed information on each device, such as network connectivity, consumable levels and impression counts. New features include the "remote front panel" feature that enables Eastern Business Systems support staff to view and control the LCD panel from anywhere on the network, as well as the ability to review service logs and update firmware. For more intuitive views and to expedite troubleshooting, devices can be grouped together in the utility by model, department, location, network status, IP address or more. Rapid deployment of new Copier / MFP's and network printers can also be accomplished by distributing print drivers to network clients and cloning the settings of a reference device to other similar models all at the click of a button.

## What is important to you?

- ▶ Reduce overall printing cost
- ▶ Save paper and reduce print volumes
- ▶ Send print jobs to more cost-efficient devices
- ▶ Control color usage
- ▶ Ability to budget for printing
- ▶ Allocate print costs to departments
- ▶ Reduce the number of printer supplies
- ▶ Restrict "print" abusers
- ▶ Allow "IT" to focus on critical tasks, not printers problems
- ▶ Automated meter collection
- ▶ Alerts for service maintenance
- ▶ Print monthly reports on print usage and trends
